

Only-One®

VITAMIN/MINERAL SUPPLEMENT

We are bombarded these days with page after page of supplements in our horse catalogs and magazines. Each supplement promising to enhance health or performance in one way or another. It can almost make us wish we had an equine nutrition degree just to figure out which ones we really need!

Wouldn't it be great to be able to step away from the guesswork and mental overload of trying to balance out our horse's diet? Think of the hundreds of dollars spent on various supplements (and special feeds) and yet you still feel that there is something lacking in your horse's diet. Imagine the peace of mind knowing that your horse is getting exactly what he/she needs. The contentment you will feel when you see your horse's health emanating thru the naturally shiny hair coat, the stronger hooves, and the overall healthy appearance that can only come from the consumption of proper balanced nutrition.

Sound too good to be true? Well thru years of study and constant monitoring of quality ingredients, we have come up with the most natural and balanced supplement on the market today. It should truly be the 'Only-One' you need. Studies have shown that when Only-One is fed free choice they will only consume the daily amount needed for optimal health. How much easier can it get? Your horse has the innate ability to crave (consume) what is naturally needed to keep their system in balance. Only-One has no added grains, flavors, or fillers so your horse will naturally only eat what is essential for their health.

Only-One is designed to be fed to horses that are consuming a diet of any feed source that does NOT contain added vitamins or minerals (such as oats or hay). Making it the perfect addition to balance the diet of horses that are on pasture or consume only hay. There are also a variety of feeds on the market that do not contain added vitamins or minerals, such as oats, corn or beet pulp, if more calories are needed to maintain weight. You may also top dress the above mentioned feeds with Only-One if it is inconvenient to offer it free choice. Even if your horse's diet fluctuates, you will know that he/she is getting the perfect balance of vitamins and minerals needed for optimal health when consuming Only-One.

GUARANTEED ANALYSIS

Calcium.....(min.)	2.20%(max.)	2.70%
Phosphorus.....(min.)	(max.)	0.01%
Salt.....(min.)	24.00%(max.)	29.00%
Copper.....(min.)	(max.)	20 ppm
Selenium.....(min.)	(max.)	2.0 ppm
Zinc.....(min.)	(max.)	25 ppm
Vitamin A.....(min.)	(max.)	40,000 IU/lb

INGREDIENTS

Calcium Bentonite Clay, Salt, (Mineral Sea Salt), Yeast Culture, Calcium Carbonate, L-Lysine, Rice Bran, Vitamin E, Thiamine, Vitamin A, Ascorbic Acid, Selenium Yeast & Vitamin D3.

Top dress Oats or hay at a rate of 8 oz. per head per day. Provide access to fresh, clean water and free-choice salt at all times. **WARNING: DO NOT** permit intake of supplemental selenium to exceed 0.3 ppm on a complete ration basis. **DO NOT** add to premixed feed.

RECOMMENDED USES

All Classes of Horses

Complete Feeds

PELLETED FOR BETTER DIGESTIBILITY

BABY BLOOM

The complete feed for your growing baby

RECOMMENDED USES

Foal to 3 Years Old

- Use as creep feed
- Use up to 3 years old
- Use for halter up to 3 years old
- Use with hay and/or pasture

SUMMIT

The peak performance feed for working and competition

RECOMMENDED USES

Adult

- Use for shows, competition and intense work
- Use with hay and/or pasture
- Use for training

Young

- Use during training

Stallions

- Use during breeding season

THRIVE

The versatile feed for most adults

RECOMMENDED USES

Adult

- Use with hay and/or pasture
- Use for maintenance

Pregnant

- Use from post breeding through 8 months as gestation ration

Stallions

- Use as daily feed on off season

RENU

The best feed for foundered and idle horses

RECOMMENDED USES

Adult

- Use with hay and/or pasture
- Horses with foundered conditions
- Horses with overweight problems
- Idle horses

SILVER

The advanced feed for older adults and revitalization

RECOMMENDED USES

Older (16 years & above)

- Best choice for older equine
- Use with hay, pasture and/or hay cubes
- Can also add water to soften for horses with dental problems

Legs Plus®

MINERAL SALT SUPPLEMENT

Raising a healthy foal these days can be quite a challenge. With all of the quality feeds and supplements available promising to help you raise a big show ready weanling it can be a little daunting. Especially when you use some of the products only to find that your fast growing foal has begun to have leg problems. Through many studies we have found that adding a proper balance of salt and minerals to your foal's diet we can help prevent these leg problems.

Our **Legs Plus** supplement includes a **Mineral Sea Salt**, which means it contains a balance of naturally occurring trace minerals. Minerals obtained through sea salt are perfectly balanced by Mother Nature in a form that can be immediately absorbed and utilized into your foal's system.

The other valuable ingredients in this supplement are **Hydrated Sodium Calcium Aluminosilicate** and calcium carbonate. The hydrated sodium calcium aluminosilicate that we use contains numerous trace minerals that nature has bound together. It is not only an excellent mineral source but has an amazing ability to bind toxins together so that your foal can readily eliminate them. The **Calcium Carbonate** that we use is one of the purest we could find. Growing foals need extra calcium to maintain proper bone development and muscle function, so we searched and found one that was worthy to be included in this wonderful supplement.

Legs Plus is designed to be fed as a top dress to your foal's feed. It may also be mixed with water and administered orally. Do not however, mix it with acidic mixtures such as applesauce, as it will activate the sodium bicarbonate making it an ineffective ingredient.

GUARANTEED ANALYSIS

Calcium.....(min.) 7.45%.....(max.) 8.95%
Salt.....(min.) 45.00%.....(max.) 50.00%

INGREDIENTS

Salt, (Mineral Sea Salt), Sodium Bicarbonate, Hydrated Sodium Calcium Aluminosilicate, Calcium Carbonate.

FEEDING DIRECTIONS

Top dress feed at a rate of 1-4 oz. daily. Provide access to fresh, clean water and free-choice salt at all times.

RECOMMENDED USES

- Young Halter:** • Add to feed daily
- Pregnant Halter Mare:** • Add to feed daily in last 3 months
- Horse with Ulcer:** • Add to feed daily

CUSTOMER TESTIMONIAL

*We have been so happy with the feed from **Eq Feeds™**. That we exclusively feed all our horses here at Arabian Woods Horse Farm, **Eq Feeds™**. We had this Mare that had injured her rear leg last year and was doing better, but was still putting so much pressure on the supporting front knee causing increase in swelling. So before we put her back into training. We put her on **Eq Legs Plus**. This has helped give her the support she needed to take the pressure of training. Now she is back under saddle and getting the support she needed to reduce the stress on her knees from **Eq Feeds™ Legs Plus**.

Eq Lytes®

ELECTROLYTE SUPPLEMENT

One of the most challenging situations with performance/endurance horses is dehydration and fatigue. This electrolyte formula is designed to promote drinking, which will help eliminate dehydration, and also contains the essential salts and minerals needed to naturally replenish their system and help combat fatigue.

Our electrolytes contain a **Mineral Sea Salt**, which means it contains a balance of naturally occurring trace minerals. Minerals obtained through sea salt are perfectly balanced by Mother Nature in a form that can be immediately absorbed and utilized into your horse's system.

The other valuable ingredients in our electrolytes are **Calcium Carbonate** and Montmorillonite Clay. Performance horses need extra calcium to maintain proper muscle function, so we searched and found one of the purest forms of calcium we could find.

Montmorillonite Clay is a special ingredient that is essential for your horse. It also contains over 70 naturally occurring trace minerals that nature has put together. It is not only an excellent mineral source but a superior toxin binder needed to help your horse eliminate unwanted toxins.

Eq Lytes may be used as a top dress to your horse's feed. It may also be mixed with a palatable substance, such as applesauce, and administered orally.

GUARANTEED ANALYSIS

Calcium.....(min.) 14.50%.....(max.) 17.40%
Phosphorus.....(min.) 0.01%.....(max.) 0.02%
Salt.....(min.) 45.00%.....(max.) 50.00%

INGREDIENTS

Mineral Rock Salt, Calcium Carbonate, Montmorillonite Clay

FEEDING DIRECTIONS

Top dress at a rate of 1-4 oz daily or may be mixed with a palatable substance such as applesauce or yogurt and be administered orally. May increase amount as needed for intense work. Provide access to fresh, clean water and free choice salt at all times.

RECOMMENDED USES

- Working horses**
- Horses in intense training**
- Horses traveling**

CUSTOMER TESTIMONIAL

*I've been in the sport of Distance Riding since 1982, and I've seen the use of electrolytes go from raw salt administered from a big wooden spoon, to the availability of dozens of products. Three years ago, I switched exclusively to **Eq Lytes**. Easy to mix, easy to administer, and my horses LOVE the taste. I race over 1,000 miles a season, and I am sure I owe my national Best Condition standing the last three years to well hydrated horses from using **Eq Lytes**.
Lori Windows, Wyanet, IL*

There is no added sugar, artificial colors, flavorings or fillers in our supplements because we didn't want to ruin an already awesome product!

Eq Lytes - Daily®

ELECTROLYTE SUPPLEMENT

We have found that it is essential to replenish your performance horse's system on a regular basis with quality ingredients. Just the stress of everyday training, working, illness or even trailering can upset the equine metabolism. This electrolyte formula is designed to help eliminate imbalances which can occur at times even before we can see them.

Water and salt are essential ingredients to any good healthy equine. Therefore our electrolyte formulas contain a **Mineral Sea Salt** which contains a balance of naturally occurring trace minerals. Minerals obtained through sea salt are perfectly balanced by Mother Nature in a form that can be immediately absorbed and utilized into your horse's system. This ingredient also will encourage your horse to drink more water.

Ulcers can be a constant problem with performance horses so we have included a pure form of **Sodium Bicarbonate**. Sodium Bicarbonate has the amazing ability to absorb excess acids in your horse's system. This will aid in the elimination of stomach upsets such as ulcers.

The other valuable ingredients in our electrolytes are **Montmorillonite Clay** and calcium carbonate. The montmorillonite clay that we use contains over 70 naturally occurring trace minerals that nature has put together. It is not only an excellent mineral source but a superior toxin binder needed to help your horse eliminate unwanted toxins. The **Calcium Carbonate** that we use is one of the purest we could find. Performance horses need extra calcium to maintain proper muscle function, so we searched and found one that was worthy to be included in this wonderful supplement.

Eq Lytes - Daily is designed to be fed as a top dress to your horse's feed. It may also be mixed with water and administered orally. Do not however, mix it with acidic mixtures such as applesauce, as it will activate the sodium bicarbonate making it an ineffective ingredient.

GUARANTEED ANALYSIS

Calcium.....(min.) 7.45%.....(max.) 8.98%
Salt.....(min.) 45.00%.....(max.) 50.00%

INGREDIENTS

Mineral Rock Salt, Sodium Bicarbonate, Montmorillonite Clay, Calcium Carbonate.

FEEDING DIRECTIONS

Top dress feed at a rate of 1-4 oz. daily. May increase amount as needed for intense work and/or during traveling to increase water intake. Provide access to fresh, clean water and free-choice salt at all times.

RECOMMENDED USES

- Add to feed daily for:**
- Working horses
 - Horses in intense training
 - Horses traveling
 - Horses with ulcers

CUSTOMER TESTIMONIAL

*At Run Along Farms we have up to 15 horses in competition or training year round. In the hot, humid summers in Illinois we use **Eq Lytes - Daily** to ensure our horses stay hydrated. In the cold, windy, winters, it is just as important. It is so palatable, even the picky eaters accept it top dressed on their feed. With the ever increasing costs of maintaining horses, **Eq Lytes - Daily** is an economical choice to help keep your horses drinking.
Julie Jackson-Biegert, Run Along Farms, Geneseo, IL*
